## Persamaan Maxwell

	Integral	Offerensial
Mukum Gauss	$\oint_{S} \vec{E} \cdot d\vec{s} = \frac{Q}{\mathcal{E}_{o}}$	$\nabla \cdot \vec{E} = \frac{\rho}{\varepsilon_0}$
	g H. ds = 0	V.H. 0
Uukum Faraday	Se E. de = - 2 MS, H.di	VXE = -MatH
Hukum Ampere	Se H de = S J.ds + d SE.E.ds	$\nabla \times \frac{\overrightarrow{H}}{M_0} = 7 + \frac{\partial}{\partial t} \ \mathcal{E}$
